

### Acceptance Test Procedure

Step	Procedure	Expected Results	Actual Results	ü or AI*
1	Run python proj.py in terminal after selecting appropriate directory	GUI window appears with a short user guide taking up the main part of the screen. 5 buttons line the top of the screen not including the red quit button.	same	
2	Click first button on the top of the screen(seeking alpha top market news)	Button remains depressed for about two seconds then the screen displays a dictionary with stock tickers to the left of the semicolon and a floating point value to the right of the colon.	same	
3	Click second button on the top of the screen(seeking alpha all market news)	Button remains depressed for about two seconds then the screen displays a dictionary with stock tickers to the left of the semicolon and a floating point value to the right of the colon.	same	
4	Click third button on the top of the screen(seeking alpha Energy news)	Button remains depressed for about two seconds then the screen displays a dictionary with stock tickers to the left of the semicolon and a floating point value to the right of the colon.	same	

5	Click fourth button on the top of the screen(seeking alpha Healthcare news)	Button remains depressed for about two seconds then the screen displays a dictionary with stock tickers to the left of the semicolon and a floating point value to the right of the colon.		
6	Click fifth button on the top of the screen(seeking alpha On the move)	Button remains depressed for about two seconds then the screen displays a dictionary with stock tickers to the left of the semicolon and a floating point value to the right of the colon.		
7	Re-click any of the buttons after that same button has already been clicked	If the program has already been running for a while, it should update the dictionary to what is currently on that page on seeking alpha, If the program has only been running for a short amount of time it is likely that the dictionary values will not change, unless something new has been published.		
8	Click the quit button	The program should close out		
9	Click on X in right corner of window	Window is dismissed and program ends		

\* After each step, if the expected results are observed then the box to the right is checked (procedure Passes).

If the expected results are not observed, then an Action Item is written up, the number of this Action Item is placed in the box, and the procedure does not pass until the Action Item is resolved.
